Question No. 1

A business analyst uses a QlikView application developed on a desktop with a screen resolution of 1280 x 800. During weekly meetings, the analyst presents the application using a projector with a maximum screen resolution of 1280 x 720. At this resolution, vertical scroll bars are displayed.

Which setting can solve the problem?

- A. View > Turn on Projector View
- B. View > Fit Zoom to Window > Apply Zoom to All Sheets
- C. Settings > Document Properties > General Tab and check Disable Scroll Bars
- D. Settings > Sheet Properties > General Tab and check Fit to Projector Screen Resolution

Answer: D

Question No. 2

A business analyst creates a document with sales data for different regions, products, and salespeople. The analyst needs to create an object that will show the percentage of the total sales when one or more values are selected.

Which two objects can the analyst use to meet these requirements? (Select two.)

- A. Text box
- B. Table box
- C. Gauge chart
- D. Mekko chart
- E. Statistics box

Answer: A, B

Question No. 3

Which two objects are created with ONLY measures? (Select two.)

- A. Option

- B. Option

- C. Option

- D. Option

- E. Option

Answer: C, D

Question No. 4

A data model contains 1 billion records and a straight table renders all of the data at the most granular level. The business users do NOT need all of the detailed information. The business analyst needs to improve the rendering time of the straight table.

Which two approaches should the analyst use? (Select two)

- **A.** Update the straight table to a more summarized view
- **B.** Replace all table fields with only one field which concatenates the values of all previous table fields
- **C.** Remove all master dimensions and master measures, and replace with distinct expressions in each visualization
- **D.** Specify a specific sort order in the output of the straight table using a field not found in the straight table columns
- **E.** Set up a calculation condition to only show the straight table if filtered down to a much smaller number of rows (e.g., 100k rows)

Answer: C, E

Question No. 5

How many dimensions and measures are required to create a scatter chart?

- **A.** One dimension and one measure
- **B.** One dimension and two measures
- **C.** Two dimensions and one measure
- **D.** Three dimensions and one measure

Answer: B
